

How to fix your Gluon Beyond Pack

Step 1: Detach the hook from the pack loop

Step 2: Release the strap from the strap that holds the hook

Step 3: Release the strap from the hook

Step 4: Take one of the two hooks that have been delivered by Kathmandu

Step 5: Make sure the hook is going from top to bottom inside the loop

Step 6: Pull the strap through the hook from the inside to the outside, starting with the bottom entry, then continue to top entry

Step 7: Pull the strap into the safety lock/keeper to secure it

Step 8: Place the hook into the loop and test its tightness

Step 9: Finish the second strap in a same way.
